#### History

##### #1 - 03/13/2017 10:56 AM - Txinto Vaz

- Status changed from New to In Progress

It seems that codedesigner needs to include the identifier in the condition or action:

This does not work:

```
<object type="udConditionLinkItem">
  <property name="id" type="long">-1</property>
  <property name="name" type="string">downButtonPressed</property>
  <property name="description" type="string">Down Button is being pressed</property>
  <property name="original_code" type="string">&lt;global&gt;;:downButtonPressed</property>
  <property name="scope" type="string">&lt;global&gt;</property>
</object>
```

This works:

```
<object type="udConditionLinkItem">
  <property name="id" type="long">-1</property>
  <property name="name" type="string">downButtonPressed</property>
  <property name="description" type="string">Down Button is being pressed</property>
  <property name="original_code" type="string">&lt;global&gt;;:downButtonPressed#50006
</property>
  <property name="scope" type="string">&lt;global&gt;</property>
</object>
```

##### #2 - 03/13/2017 10:58 AM - Txinto Vaz

This is the definition that does not work:

```
<object type="udConditionItem">
  <property name="id" type="long">50006</property>
  <property name="name" type="string">downButtonPressed</property>
  <property name="description" type="string">Down Button is being pressed</property>
  <property name="code" type="string">((downReqDI==TRUE) || (hmibuttons &amp;
CFG_FMI_BUTACQ_HMI_DOWN_MASK) )</property>
  <property name="scope" type="string">&lt;global&gt;</property>
  <property name="signature" type="string">&lt;global&gt;;:downButtonPressed</property>
  <property name="inline" type="bool">1</property>
  <property name="retval_data_type" type="int">1</property>
  <property name="retval_value_type" type="int">0</property>
  <property name="retval_data_modifier" type="int">0</property>
  <property name="user_retval_decl_place" type="int">0</property>
  <property name="function_modifier" type="int">0</property>
</object>
```

And this works:

```
<object type="udConditionItem">
  <property name="id" type="long">50006</property>
  <property name="name" type="string">downButtonPressed</property>
  <property name="description" type="string">Down Button is being pressed</property>
```

```
<property name="code" type="string">((downReqDI==TRUE) || (hmibuttons &
CFG_FM1_BUTACQ_HMI_DOWN_MASK))</property>
<property name="scope" type="string">&lt;global&gt;</property>
<property name="signature" type="string">&lt;global&gt;::downButtonPressed#50006</property>
<property name="inline" type="bool">1</property>
<property name="retval_data_type" type="int">1</property>
<property name="retval_value_type" type="int">0</property>
<property name="retval_data_modifier" type="int">0</property>
<property name="user_retval_decl_place" type="int">0</property>
<property name="function_modifier" type="int">0</property>
</object>
```

### #3 - 03/13/2017 11:02 AM - Txinto Vaz

The code implied in conditions is [source:app/views/projects/gen\\_code.cdp.dryml#L282](source:app/views/projects/gen_code.cdp.dryml#L282)

and

[source:app/views/projects/gen\\_code.cdp.dryml#L215](source:app/views/projects/gen_code.cdp.dryml#L215)
