

uCANca - Bug #801

XCos Skeleton for some inconsitent subsystems crashes on Scilab

05/01/2018 06:14 AM - Txinto Vaz

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assignee:	Txinto Vaz	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Spent time:	0.00 hour
Description			
Display a warning before executing the generator. Or prevent generating it.			

History

#1 - 05/01/2018 06:16 AM - Txinto Vaz

- Subject changed from *XCos Skeleton for subsystems with no I/O gives crashes on Scilab* to *XCos Skeleton for some inconsitent subsystems crashes on Scilab*

I've tried adding i/o but crashes the same way.
There is another root cause.

#2 - 05/01/2018 07:02 AM - Txinto Vaz

- File *diff.txt* added
- File *robotbase.xcos* added
- File *robotbaseSinOctolinks.xcos* added
- File *issue801.sqlite3* added

Subimos archivos que funcionan y no funcionan, y la diferencia.
Guardamos en el servidor de ucanca1d una copia de seguridad de lo que hay en la bd de producción y la adjuntamos.
